SPS Transition Crossing with SFTPRO and CNGS

E. Métral

- Measurements made on 02/10/2008 (see SPS logbook) by Karel, Fabio and Stephane
- This is what Sandra and Wolfgang are trying to measure in the PS (as a first step)
- This should give us an estimate of the longitudinal BB impedance (SC + machine)

Meas. of 02/10/2008 by Karel, Fabio and Stephane

Elias Métral, 5th Informal SPS impedance meeting, 03/10/2008

Reminder: Simulation done in the past for the PS nTOF bunch (with only SC)
